Fresh graduate in Information Technology with hands-on experience in developing web applications using PHP (Laravel) and MySQL. Experienced in building CRUD systems, relational database design, REST APIs, and basic authentication modules. Comfortable maintaining existing codebase, fixing bugs, and implementing new features while collaborating with senior developers in a team environment.

EDUCATION

Bachelor of Technology (B.Tech.) - Technology **Malang**
Brawijaya University, Malang Aug 2021 - Jun 2025

- Completed **145 credits** with a **GPA of 3.65 / 4.00**.
- Specialized in backend development using PHP/Laravel.
- Engaged in coursework and projects focused on REST API design, clean architecture, and relational data management.

WORK EXPERIENCE

PT Griya Telko Nusantara **Malang**
Backend Developer & IT Documentation Intern March 2025 – Oct 2025

- Developed 20+ REST API endpoints using Laravel 12 for internal inventory and tool-loan system.
- Implemented CRUD modules with relational validation across Branch, Item, and Variant entities.
- Built API dashboard to monitor tool requests and branch statistics.
- Integrated API documentation using Swagger to support frontend team integration.
- Assisted in debugging and maintaining existing backend features.

PT Kartika Sari Mulia **Malang**
Laravel Fullstack Developer Oct 2025 – Present

- Developed internal HRIS-based attendance system using Laravel 8 and SQL Server.
- Implemented check-in/check-out system with attendance status calculation (late, on-time, leave).
- Built leave approval workflow for HR and supervisors.
- Generated attendance recap reports with Excel export functionality.
- Designed relational database structure for employee, attendance, and leave management.
- Implemented role-based authentication for HR and staff users.
- Developed dashboard for monitoring employee attendance statistics.
- Currently developing internal ticketing system with status workflow and request tracking.
- Maintained and enhanced existing system features based on user feedback.

PROJECT EXPERIENCE

Inventory Web
Full Stack Developer Jul 2025

- **Tech Stack:** Laravel 12, MySQL, Tailwind CSS
- Developed a web-based inventory management system.
- Built CRUD features for tool requests and inventory data.
- Implemented relational database structure (Branch, Item, Variant).
- Developed user authentication and basic dashboard.
- Designed responsive interface using Tailwind CSS.
- Tested API functionality using Postman.

Griya Client Zone
Full Stack Developer Sept 2025

- **Tech Stack:** Laravel 12, MySQL, Tailwind CSS
- Developed a client portal for ISP customers to access account and service information.
- Implemented secure login system.
- Developed features for profile management and payment history.
- Integrated multiple database connections for customer data.
- Built responsive user interface for mobile access.
- Ensured secure password management.

Repository: Private

ORGANIZATIONAL AND COMMITTEE EXPERIENCE

Hology 6.0 **Malang**
Public Relations Coordinator May 2023 - Oct 2023

- Coordinated communication with internal and external stakeholders.

Badan Eksekutif Mahasiswa (BEM) FILKOM **Malang**
Staff of Environmental Social Feb 2022 - Jan 2023

- Led a 20-member committee to organize a charity event and communal iftar.
- Managed event budget of approximately IDR 2–3 million.

TECHNICAL SKILLS

Backend Development

- PHP (Laravel)
- REST API Development
- MySQL, SQL Server (Relational Database Design)
- Eloquent ORM
- Authentication & Role-Based Authorization

Tools

- Git & GitHub
- Postman
- Swagger
- PHPUnit (Basic)

Frontend (Basic Integration)

- HTML
- Tailwind CSS
- JavaScript (Basic)

Soft Skills: Critical Thinking | Teamwork | Adaptability | Problem Solving | Public Speaking
Language: Indonesia (Native) | English (Intermediate)
